ISO 9001:2015

ACB QMS 29

ISO 9001 is defined as the international standard that specifies requirements for a quality management system (QMS). Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements.

- Organize processes
- Improve the efficiency of processes
- Continually improve

We are making digitalization more straightforward, faster – and most importantly, more affordable for all.

The traditional processes for business owners to create a website and run ads are opaque, stressful and slow. Fees are not transparent, and some services are highly variable. We are breaking the status quo.
